Each block: 60 households; a dining hall for 30 households or 300-480 adults plus children. Each household has an assigned garden for 10 years. The block faces 20-wide streets. The households are made of stone and have glass windows for plenty of light. No door is locked.

Each eating hall: 1 syphragant presides over 30 households [familia] composed of 10-16 adults plus children (300-480 adults) served by 15-24 slaves. The oldest presides over each 3-story stone household, which has an assigned garden in this “garden city.”

Each city has 4 central markets, 1 to serve each quarter of the city or 50 households (15,000-24,000 adults) and 13 temples, each serving 4,600 to 7,400 adults and children. Amaurot is the only city with the Island Senate Chamber.
